

K.S. Rangasamy College of Technology

(Autonomous)

Accredited by NAAC with 'A++' Grade,

Approved by AICTE, Affiliated to Anna University, Chennai

Curriculum & Syllabi

of

B.Tech. Information Technology

Programme Accredited by NBA TIER – 1

(For the Batch Admitted in 2026 – 27)

R 2026

(Industry-Integrated, Skill-Based,
Practical-Oriented, Project-Based
and SDG-Aligned Curriculum)

**KSR Kalvi Nagar, Tiruchengode – 637 215.
Namakkal District, Tamil Nadu, India**

K.S. RANGASAMY COLLEGE OF TECHNOLOGY, TIRUCHENGODE -637215
(An Autonomous Institution, Affiliated to Anna University, Chennai)

CURRICULUM – R2026

B.Tech. Information Technology
(For the Batch Admitted in 2026 - 27)

SEMESTER I

S. No.	Course Code	Course Title	Category	Hours / Semester					C	Max. Marks		
				CI		LI	TW / SL	TH		CA	ES	TM
				L	T	P						
Induction Programme			-	-	-	-	-	-	0	-	-	-
THEORY COURSES												
1.	26MAC01T	Linear Algebra and Ordinary Differential Equations	BS	45	15	0	60	120	4	40	60	100
2.	26CHC02T	Engineering Chemistry	BS	45	0	0	45	90	3	40	60	100
3.	26TAC01T	Heritage of Tamils (தமிழர் மரபு)	HS	15	0	0	15	30	1	100	0	100
THEORY WITH LABORATORY COURSES												
4.	26ENC01I	English Essentials-I	HS	15	0	30	15	60	2	50	50	100
5.	26MEC03I	Engineering Graphics	ESc	15	0	60	15	90	3	50	50	100
6.	26ITC04I	Computational Thinking	ESc	15	0	30	15	60	2	50	50	100
7.	26CSC04I	C Programming	ESc	45	0	30	45	120	4	50	50	100
LABORATORY COURSES												
8.	26CHC02L	Engineering Chemistry Laboratory	BS	0	0	30	0	30	1	60	40	100
9.	26MEC01L	IDEA Lab Maker Space	ESc	0	0	60	0	60	2	60	40	100
EMPLOYABILITY ENHANCEMENT COURSES												
10.	26TPC01P	Career Skill Development-I	CG	0	0	30	0	30	1*	100	0	100
MANDATORY COURSES												
11.	26MYC01T	Universal Human Values	MY	15	15	0	60	90	3*	100	0	100
Total				210	30	270	270	780	22	800		

* Career Skill Development-I - additional credit is offered and not accounted for CGPA

* Universal Human Values - additional credits is offered and not accounted for CGPA

Mandatory Additional Credit SDG Courses

S.No.	Course Code	Mandatory Non-Credit Skilling Course	SDGs addressed	Category	CI		LI	TW / SL	TH	C	Max Marks		
					L	T	P				CA	ES	TM
1.	26MSDGC01	Mandatory Additional Credit SDG Courses – 1	SDG 1 to 9	MAC	18	0	0	12	30	1	100	0	100

Note:

CI – Classroom Instructions; **LI** – Laboratory Instructions; **L** – Lecture; **T** – Tutorial;

P – Practical; **TW** – Term Work; **SL** – Self Learning; **TH** – Total Hours; **C** – Credit;

CA – Continuous Assessment; **ES** – End Semester; **TM** – Total Marks

Passed in BoS Meeting held on 06.05.2026

Approved in Academic Council Meeting held on 13.06.2026

Syllabus

K.S.Rangasamy College of Technology – Autonomous R2026									
B.E. / B.Tech. (Common to CSE, CSE(AI&ML), AI&DS and IT)									
26MAC01T - Linear Algebra and Ordinary Differential Equations									
Semester	Hours/Semester					Credit	Maximum Marks		
	CI		LI	TW/SL	TH		C	CA	ES
	L	T	P						
I	45	15	0	60	120	4	40	60	100
Linear Equations*									
Row reduction and Echelon forms - Solution of linear systems - Existence and uniqueness theorem - Vector equations - Linear combinations of vectors - Linear independence. Introduction to linear transformation - Matrix of a linear transformation - Transformation from R^n to R^m .									[9]
Vector Spaces*									
Vector spaces and subspaces - Null spaces - Row and column spaces - Basis and dimension of vector spaces - Rank - Change of basis.									[9]
Matrices*									
Characteristic equation - Eigenvalues and Eigenvectors of a real matrix - Properties of Eigenvalues and Eigenvectors - Cayley-Hamilton theorem - Diagonalization of matrices by orthogonal transformation - Reduction of a quadratic form to canonical form by orthogonal transformation - Nature of quadratic forms.									[9]
Differential Calculus*									
Representation of functions - Limit of a function - Continuity - Derivatives - Differentiation Rules: Sum, Product, Quotient, Chain Rules - Successive differentiation - Leibnitz's theorem - Maxima and Minima of functions of one variable.									[9]
Ordinary Differential Equations*									
Linear differential equations of second and higher order with constant coefficients - R.H.S is of the form $e^{\alpha x}$, $\sin \alpha x$, $\cos \alpha x$, x^n , $n > 0$ - Differential equations with variable coefficients: Cauchy's and Legendre's form of linear equations - Method of variation of parameters.									[9]
Total Hours: (Lecture - 45+Tutorial -15)									60
Text Book(s):									
1.	David C Lay, Steven R Lay and Judith McDonald, "Linear Algebra and its Applications", Pearson Education Limited, Harlow, 6 th Edition, 2022.

	L	T	P			15	0	30	2	
I										
Foundations of Computational Thinking Fundamentals of Computing - Data Representation and Processing - Input, Processing, and Output. Computational Thinking Concepts: Decomposition - Pattern Recognition –Abstraction - Logical Reasoning - Problem Solving Strategies - Decision Making - Introduction to Algorithms - Flowcharts and Pseudocode.										[5]
Algorithms and Problem-Solving Techniques Problem Definition and Analysis - Algorithm Design and Representation - Pseudocode Writing - Flowchart Design - Sequential, Selection and Iteration Logic - Brute Force and Divide-and-Conquer Approaches - Introduction to Recursive Thinking - Algorithm Correctness - Testing and Validation.										[5]
Scratch Programming: Introduction to Scratch Environment - Scratch Blocks and Operators - Variables and User Input - Decision Making and Looping - Lists and Basic String Operations - Broadcast and Events - Procedures (My Blocks) - Problem Solving through Interactive Applications and Games.										[5]
Practical : 1. Identify and solve simple real-life, scientific, or engineering problems by developing algorithms and flowcharts using Flowgorithm. 2. Develop algorithmic solutions for mathematical and logical problems using Flowgorithm. 3. Illustrate sequential, decision-making, and looping constructs through pseudocode and flowchart design. 4. Apply computational thinking concepts such as decomposition, abstraction, and logical reasoning to solve real-world problems using Flowgorithm. 5. Develop algorithmic solutions using brute force, divide-and-conquer, and introductory recursive thinking in Flowgorithm. 6. Develop Scratch programs using variables, operators, conditions, loops, lists, and procedures (My Blocks) to solve computational problems. 7. Design and develop interactive applications and simple games using Scratch by integrating variables, conditions, loops, lists, events, procedures, and multimedia features (motion, looks, sound, and pen). Tools / software used: Flowgorithm, Scratch.										[30]

	CI		LI				C	CA	ES
	L	T	P			45	120	4	50
I	45	0	30						
Introduction and C Fundamentals* Introduction to Computers – C Language History – Structure of a C Program – Compilation and Execution Process – Tokens – Keywords – Identifiers – Data Types – Variables and Constants – Operators and Expressions – Type Conversion – Input and Output Statements – Program Testing and Debugging Techniques. Conditional Statements (if, if-else, nested if, switch) – Iterative Statements (while, do-while, for) – break and continue,									[9]
Arrays and Strings* Arrays- One-Dimensional Arrays – Two-Dimensional Arrays – Matrix Operations –Searching Techniques, Problem Solving using Arrays. Strings – Array of Strings- String Manipulation without using inbuilt functions- Problem Solving using String Handling Functions									[7]
Pointers and Functions* Pointer Variables – Pointer Operators- Pointer Arithmetic – Arrays and Pointers – Strings and Pointers – Dynamic Memory Allocation (malloc, calloc, realloc and free). Functions – Function Prototypes – Storage Classes – Call by Value and Call by Reference – Recursive Functions – Passing Arrays to Functions – Scope and Lifetime of Variables – Problem Solving using Functions and Strings.									[11]
User-Defined Data Types and Preprocessor Directives * Structures and Initialization – Arrays of Structures – Nested Structures – Structure Pointers – Unions – Bit Fields- Enumerations – typedef. Preprocessor Directives (#include, #define, Conditional Compilation)									[9]
File Handling Techniques* File Streams –File Handling Functions - Reading and Writing Characters – Reading and Writing Numerical Data - Reading and Writing Strings – Formatted Input and Output in Files – Sequential Files – Random Access Files – Command Line Arguments - Application Development using C.									[9]
Practical: 1. Develop programs to solve basic computational problems using mathematical expressions and operators. 2. Implement computational applications using selection control structures. 3. Develop applications using iterative constructs for problem solving and data processing. 4. Implement array-based applications for data storage, manipulation, and analysis. 5. Develop string processing applications using string handling functions 6. Develop applications using pointers and dynamic memory management techniques. 7. Design and implement modular solutions using functions and recursion. 8. Implement applications using structures, unions, and bit fields. 9. Develop programs using enumerations, typedef, and preprocessor directives. 10. Develop file-based applications for data storage, retrieval, and processing using file handling operations. 11. Design and develop a micro project to solve real-world problems using C programming techniques. Tools / software used: Code::Blocks IDE / Dev-C++ / Visual Studio Code/ Online Programming Platform									[30]

List of Experiments:									
1. Analysis of total hardness of given water sample before and after purification by EDTA method.*									
2. Determination different types of alkalinity present in given water sample.*									
3. Determination of pH of a given solution using a pH meter.*									
4. Estimation of amount of acid in the given solution by conductivity meter.*									
5. Determination of percentage corrosion by weight loss method. **									
6. Comparative study of corrosion resistance of coated and uncoated mild steel. **									
7. Determination of iron strength by measuring cell potential. **									
8. Fabrication of a bio-electrochemical cell and determination of its cell potential. **									
9. Fabrication of polymer sheet by solvent casting. **									
10. Determination of molecular weight of a polymer using an Ostwald viscometer. **									
Lab Manual

	L	T	P						
I / II	0	0	60	0	60	2	60	40	100

(A). Product Assembly and Fabrication Practices (3)

- i. Power Tools and its handling techniques
- ii. Dis-assembly and assembly of Computers
- iii. Dis-assembly and assembly of home appliances – Mixer Grinder / Ceiling Fan / Table Fan / Washing Machine / Air-Conditioners / Refrigerators / Bicycle
- iv. Planning and assembly of household plumbing lines – Water Taps, Faucets, Shower Units, Flush Tanks, Wash Basins & Pipe Fittings
- v. Fabrication of simple sheet metal models

(B). Welding Practices (1)

- i. Welding types, selection & safety measures.
- ii. Hands-on session on base material preparation, joint groove preparation, and MAW, GMAW, GTAW welding process on carbon steel & stainless-steel plates and pipes.

(C). Contemporary Systems (4)

- i. Understanding CNC Machines, digital fabrication equipment and safety practices
- ii. Demonstration of Solid Modelling & assembly of components
- iii. Fabrication of simple components / parts using 3D Printers
- iv. Demonstration of customized pattern cutting and engraving on Acrylic Sheets
- v. Demonstration of customized pattern cutting and engraving on Wood

(D). Electrical Wiring Practices (1)

- i. Electrical Installation tools, equipment & safety measures
- ii. Hands-on session of household electrical wiring – Fuses, Miniature Circuit Breakers, Distribution Box, Lightings, Fans, Calling Bells, Motors & Uninterrupted Power Supply

(E). Electronics Components / Equipment Practices (3)

- i. Electronic components, equipment & safety measures
- ii. Hands-on session of PCB layout design of Bridge Rectifier / Operational Amplifier
- iii. Hands-on session of Soldering and testing of Bridge Rectifier / Operational Amplifier
- iv. Hands-on session of Integration of Sensors and actuators with a microcontroller
- v. Demonstration of Programmable Logic Control (PLC) circuit.

Syllabus									
K.S.Rangasamy College of Technology – Autonomous R2026									
Common to all Branches									
26MYC01T - Universal Human Values									
Semester	Hours/Semester					Credit	Maximum Marks		
	CI		LI	TW/SL	TH		C	CA	ES
	L	T	P						
I	15	15	0	60	90	3*	100	0	100
Introduction to Value Education Understanding Value Education- Self-exploration as the process for value education- Continuous happiness and prosperity-the basic human aspirations-right understanding-relationship and physical facility –happiness and prosperity - current scenario – method to fulfil the basic human aspirations									[3]
Harmony in the Human Being * Understanding the human being as the Co-Existence of the self and the Body - Distinguishing between the needs of the self and the body-the body as an instrument of the self- understanding harmony in the self- harmony of the self with the body – programme to ensure self-regulation and health.									[3]
Harmony in the Family and Society Harmony in the Family –the basic unit of human interaction-values in human- to - human relationship –‘Trust’ the foundation value in relationship –‘ Respect’ as the right evaluation- understanding harmony in the society –vision for the universal human order.									[3]
Harmony in the Nature/Existence ** Understanding harmony in the Nature-Interconnectedness, self-regulation and mutual fulfilment among the four orders of nature – realizing existence as co-existence at all levels – the holistic perception of harmony in existence.									[3]
Implications of the Holistic Understanding Natural Acceptance of human values- definitiveness of human conduct- a basis for humanistic education, humanistic constitution and universal human order- competence in professional ethics –holistic technologies, production systems and management models-typical case studies – strategies for transition towards value-based life and profession									[3]
Total Hours: (Lecture -15 + Tutorial – 15)									30
Text Book(s):

	L	T	P						
II	45	15	0	60	120	4	40	60	100
Integral Calculus* Definite and indefinite integrals - Substitution rule - Techniques of integration: Integration by parts, integration of rational functions by partial fraction, integration of irrational functions - Improper integrals.									[9]
Multiple Integrals* Double integration - Cartesian and polar co-ordinates - Change of order of integration - Area as double integral - Triple integration in cartesian co-ordinates.									[9]
Functions of Several Variables* Partial differentiation - Homogeneous functions and Euler's theorem - Jacobians - Taylor's series for functions of two variables - Maxima and minima of functions of two variables - Constrained maxima and minima: Lagrange's method of undetermined multipliers.									[9]
Solution of Equations and Eigenvalue Problem* Algebraic and Transcendental equations - Newton Raphson method - Gauss elimination method - Gauss Jordan method - Iterative methods: Gauss Jacobi method - Gauss Seidel method - Eigen value of a matrix by Power method.									[9]
Interpolation and Numerical Integration* Lagrange's interpolation - Newton's forward and backward interpolation - Single integral: Trapezoidal rule - Simpson's 1/3 and 3/8 rule.									[9]
Total Hours: (Lecture - 45+ Tutorial -15)									60

Semester	Hours/Semester					Credit	Maximum Marks		
	CI		LI	TW/SL	TH		C	CA	ES
	L	T	P						
I/II	45	0	0	45	90	3	40	60	100
Band Theory of Solids** Origin of energy bands - Classification of solids based on electrical properties and energy band gap - Semiconductors and doping-Carrier concentration of electrons and holes in intrinsic semiconductors-Extrinsic semiconductors (Qualitative) - Hall effect - Determination of Hall coefficient - Theory of p-n junctions - Applications: Photovoltaic Cells, LEDs. Case study: AI assisted fault detection in LED devices based on electrical characteristics									[9]
Laser and Fiber Optics** Interaction of light with matter - Expression for energy density at thermal equilibrium in terms of Einstein's coefficients - Characteristics of laser - Requisites of laser system - semiconductor and CO ₂ laser - Applications of lasers in computing and data technology - Optical fibre - Principle of working - Types - Acceptance angle and numerical aperture - Application-Fiber optic communication. Case study: Simulation of light propagation through in an optical fibers using MATLAB									[9]
Heat Transfer Mechanisms* Temperature, Heat, and Internal energy - Thermal expansion of solids and liquids - Modes of heat transfer - Heat conduction through a compound media (series and parallel) - Determination of thermal conductivity of bad conductor-Convection - application in science and domestic - Solving problems - Stefan-Boltzmann law of radiation - Experimental determination of Stefan's constant. Case study: Energy-efficient thermal management in smartphones using heat transfer principles									[9]
Magnetism and Sensor Technology** Origin of magnetic moment - Classification of magnetic materials-Hysteresis based on Domain theory - soft and hard magnetic materials-Types of sensors - GMR sensor - Industrial automation and robotics - Resistive sensor: Humidity measurement-Pressure sensing by capacitive and flex method - Piezoelectric transducers - Distance measurement (pulse - echo) and velocity of fluid. Case Study: Smart agricultural monitoring using resistive humidity sensors and AI									[9]
Quantum Computing** History of quantum computing and quantum information - Classical and quantum computing - Core principles of quantum computing - Quantum system for information processing - Qubit - Qubit logic gates- Classical bits - Qubit as a two-level system - Quantum computing advantages and limitations - Applications - Global perspectives - Future directions Case Study: Quantum computing for drug discovery and materials science									[9]

	L	T	P							
II	15	0	30	15	60	2	50	50	100	
Cause and Effect Connectives* Listening – Radio / TV / Podcast Interview (survivors’ tale) and framing a set of instructions/Do’s and Don’ts Speaking - Asking questions and answering, Conducting an interview (of an achiever/survivor) Reading – Excerpts of Literature (short stories), Journal articles on issues like Global warming Writing –Instructions; Official letter /email (Request for internship / Industrial visit) Grammar – If clauses/conditional clauses, Imperatives Vocabulary – Cause and effect expressions, Idioms										[9]
Compare and Contrast* Listening –Product reviews and gap fill exercises, Short Talks (like TED Talks) for specific information Speaking - Speaking persuasively about specifications of a product (e.g., home appliances) Reading – Graphical content (table/chart/graph) and making inferences Writing – Compare and Contrast Essay Grammar – Degrees of Comparison; Tenses Vocabulary – Order of Adjectives, Transition words										[9]
Problem and Solution* Listening – Group discussion (case study) Speaking - Describing visual content (Pictures/Table/Chart) Reading – Visual content (Pictures on social issues / natural disasters) for comprehension; Editorial Writing – Picture description; Problem and Solution Essay Grammar – Modal verbs; Relative pronoun Vocabulary – Negative prefixes, Signal words for problem and solution.										[9]
Reporting* Listening – Listening to news reading Speaking - Analytical discussion on various aspects of a given problem. Reading – Newspaper report on survey findings Writing – Survey report, Making recommendations Grammar – Active and passive voice, Direct and Indirect speech Vocabulary –Reporting verbs, Numerical adjectives										[9]
Presentation* Listening – Listening for Gist and Specific Information Speaking - Making presentation with visual component (PPT slides) (job interview/project / innovative product presentation) Reading – Skimming and Scanning Techniques and Developing Critical Reading Skills Writing –Common Errors in Student Writing and AI Tools for Writing Enhancement Grammar –Prepositional phrases Vocabulary – Fixed expressions, Collocations.										[9]

II	30	0	0	30	60	2	100	0	100
Introduction to Sustainable Development * Definition and Principles of Sustainable Development. Pillars: Economic, Social, Environmental Sustainability, Agenda 2030: 17 Sustainable Development Goals (SDGs). Interconnectedness of SDGs: Examples from Tamil Nadu (Ex: Smart Cities Mission, Water Resource Projects) SDG Indicators and Targets. Challenges in Achieving SDGs: National and Regional (Example: urbanization in TN, climate vulnerability). Role of Stakeholders: Government, Industry, Academia, Citizens.									[6]
Air Pollution and Mitigation Strategies ** Sources and Impacts: Urban & Industrial Air Pollution. Greenhouse Effect, Global Warming, Climate Change. Ozone Layer Depletion and Acid Rain. Mitigation Strategies: Carbon Capture and Utilization (CCU) in industries, Renewable Hydrogen and Biochar, Green Infrastructure: Urban afforestation, green walls, AI & IoT-based air quality monitoring.									[6]
Sustainable Waste and Water Management *** Classification of Solid and Liquid Wastes- Waste Management: 5R Approach - Waste Management Process: Collection, Segregation, Treatment, and Disposal - Municipal Waste (MSWM) - E-waste. Water Pollution and Wastewater Treatment: Nanotechnology, Bioremediation, Coagulation, Photocatalysis, Floating Wetlands (Case study: Chennai Eco-restoration Projects), IoT-Enabled Pollution Monitoring, Industrial Discharge Regulation									[6]
Sustainable Practices in Agriculture and Energy **** Renewable Energy: Solar (Example: TN Solar Mission), Wind, Hydro, Bioenergy. Sustainable and Climate-Resilient Agriculture - Green Auditing and Farm Practices, Smart Irrigation Systems: Soil Moisture Sensors, Evapotranspiration Systems, Drip Irrigation with Automation, AI/IoT in Precision Farming, Water Conservation: Rainwater Harvesting, Watershed Protection (Case: TN Water Resource Conservation Programs).									[6]
Technology in Natural Resource Management ***** Role of Data and Digital Tools in Sustainability, IS, GPS, Remote Sensing: Applications in Land Use, Forests, Water Resources, Digital Image Processing in Forecasting Disasters, Environmental Information Systems: ENVIS, EIA Tools, MoEFCC Portals, Use of Web Technologies and Mobile Apps for Citizen Participation (e.g., TN Smart Cities dashboard)									[6]
